CITING FROM CENTAUR

How to cite publications from the institutional repository, CentAUR

As a general rule, you should use the version of a publication in CentAUR only as a preview and you should cite the published version wherever possible. The final published version can be accessed by following the DOI or URL links in the CentAUR record or obtained through your Library.

YOU WILL NEED TO CITE THE CENTAUR VERSION IF:

The item has been published, but you are unable to access and read the published version

This could be because the item is behind a journal's subscription control (paywall) and your library does not have a current subscription, but you can ask them to order it via the inter-library loans service. In the event that you have still been unable to read the published version:

In your reference list, you should list the published version and also provide a link to the version that you have read in CentAUR:

> Beaman, C. P. and Williams, T. I. (2010) Earworms ("stuck song syndrome"): towards a natural history of intrusive thoughts. British Journal of Psychology , 101 (4). pp. 637-653. ISSN 0007-1269 doi: 10.1348/000712609X479636
> Accepted manuscript version accessed on 9th June 2017 from
> http://centaur.reading.ac.uk/5755

In the body of your text, refer to the CentAUR version. If your referencing style requires you to include page numbers refer instead to sections or paragraphs so that someone reading the published version can find the same section there. Do not use page numbers as these will differ between versions:

> (Beaman, C. P. and Williams, T. I. 2010, Discussion section, para 1)

The item has not yet been published, e.g. it is in press

In your reference list, list the CentAUR version but don't include page numbers from this version in your citation:

> Scott, J. (2017) On using Cholesky-based factorizations and regularization for solving rank-deficient sparse linear least-squares problems. SIAM Journal on Scientific Computing. ISSN 1095-7197 (In Press)
> Accepted version accessed on 9th June 2017 from http://centaur.reading.ac.uk/70577

In the body of your text, refer to the CentAUR version. If your referencing style requires you to include page numbers refer instead to sections or paragraphs so that someone reading the published version can find it there. Do not use page numbers as these will differ between versions:

> (Scott, J, 2017, Introduction section, para 3)

CentAUR is the primary location for the item and it is not published elsewhere

In your reference list, cite the CentAUR version:

> Melia, N. (2016) On predicting the opening of Arctic sea routes. PhD thesis, University of Reading.
> Accessed on 9th June 2017 from http://centaur.reading.ac.uk/66414

In the body of your text, use the CentAUR version page numbers:

> (Melia, N. 2016, p4)

Always follow the usual referencing style for your discipline or intended publication. For further guidance see Citing References at http://libguides.reading.ac.uk/citing-references
