Figure 3.2: Transverse sections of anthers from the main tiller of KWS Sterling. (a-c) 0 days post 39ZS, control (20/20°C), (d-f) 3 day post 39ZS, control (20/20°C), (g-i) 3 days post 39ZS, after 3 days of stress (35/35°C). Anthers from (a,d,g) **proximal**, (b,e,h) middle and (c,f,i) **distal** position of ear. E= epidermis, En= endothecium, MC= meiotic cell, ML= middle layer, PMC= pollen mother cell. T= tapetum. X 100 magnification, Scale bars **50µm**.
