Figure 1. Distribution of the number of hotels (international hotel chains) in Russian cities

Table 1 – Variables description

Variable	Description
Rating	Online rating posted by a reviewer
Individualism (IDV)	Preference for a loosely-knit social framework in which individuals are expected to take care of only themselves and their immediate families*
Masculinity (MAS)	Preference in society for achievement, heroism, assertiveness, and material rewards for success*
Uncertainty Avoidance (UA)	Degree to which the members of a society feel uncomfortable with uncertainty and ambiguity*
Power Distance (PD)	Degree to which the less powerful members of a society accept and expect that power is distributed unequally*
Reviewer Experience (RE)	Value that represents the number of reviews written in the past by the reviewer on the platform (i.e., the reviewer' online experience in writing online reviews)
Observed Average Rating (Obs_Avg_Rat)	Hotels' review average rating as observed by the reviewing guest at the time when s/he posted her/his review
Reviewer knowledge (RK) of the destination	It represents the special badge named Destination GURU given by Booking.com to knowledgeable reviewers of a destination (dummy variable: 0 if not present)
Length of Stay (LoS)	Number of nights spent in the hotel by the reviewer
Trip Purpose (Leisure)	It is a dummy variable that is equal to 1 if the reviewer is travelling for leisure, and zero otherwise

Appendix 2 - Country of origin frequencies

Hypotheses	Coefficient (Std. Err.)		
	OLS regression	Tobit regression	
H1: Reviewers' individualism (IDV) is negatively related to online review ratings; as such online hotel reviewers from cultural groups with higher individualism (IDV) tend to give lower online ratings.	-0.0006** (0.0003)	-0.0013*** (0.0004)	Supported
H2: Reviewers' masculinity (MAS) is negatively related to online review ratings; as such online hotel reviewers from cultural groups with higher masculinity (MAS) tend to give lower online ratings.	-0.0023**** (0.0003)	-0.0026**** (0.0003)	Supported
H3: Reviewers' uncertainty avoidance (UA) is negatively related to online review ratings; as such online hotel reviewers from cultural groups with higher uncertainty avoidance (UA) tend to give lower online ratings.	-0.0005* (0.0002)	-0.0006* (0.0003)	Supported
H4: Reviewers' power distance (PD) is negatively related to online review ratings; as such online hotel reviewers from cultural groups with higher power distance (PD) tend to give lower online ratings.	-0.0021**** (0.0003)	-0.0032**** (0.0004)	Supported
H5: The higher the reviewers' perceived experience, the lower the online ratings they will give.	-0.0007** (0.0048)	-0.0156*** (0.0058)	Supported
